

Android Auto™

Overview

Android Auto allows you to access supported smartphone applications through the MyIsuzu Co-pilot Head Unit display. Once connected, you can safely access navigation, music, phone calls, messaging and Google Assistant directly from the display.

Android Auto is a trademark of Google LLC. Compatible Android phone and compatible active data plan required.

How do I setup Android Auto?

To complete the first-time setup, ensure the following requirements are met:

- Use an Android smartphone running Android 6.0 or higher with an active mobile data connection.
- Ensure the Android Auto app is available on your phone.
 - Android 9 or earlier: Install the Android Auto app from the Google Play Store on your phone before connecting.
 - Android 10 or later: Android Auto is built into the Android operating system.

Connecting Android Smartphone

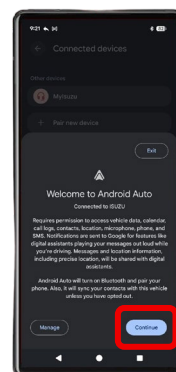

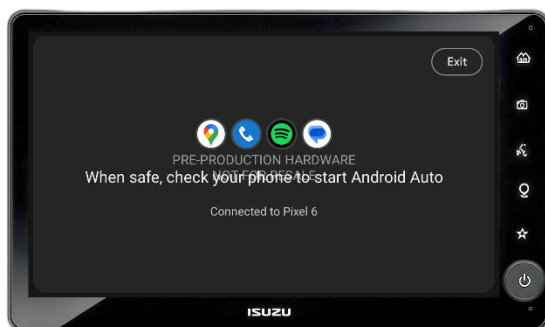

Wired Android Auto Connection

Before Connecting

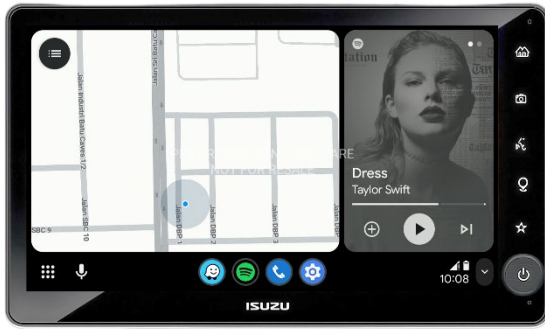

- Use a high-quality USB cable.
- Unlock your Android phone before connecting (if required).

Connection Procedure

1. Connect the Android phone to the Head Unit using a USB cable.
2. Follow the prompts displayed on the Head Unit, check the phone to learn safety information, accept the privacy policy, and grant the permissions required by Android Auto by selecting 'Continue'.

3. Android Auto will connect after the setup is complete.

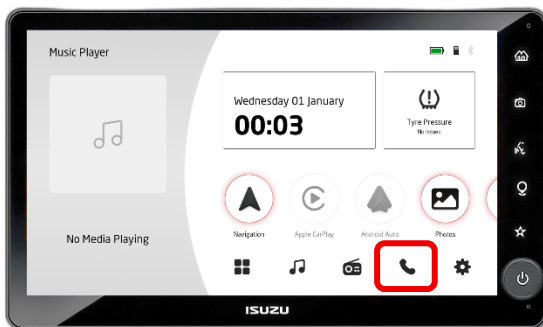

Wireless Android Auto Connection

Before Connecting

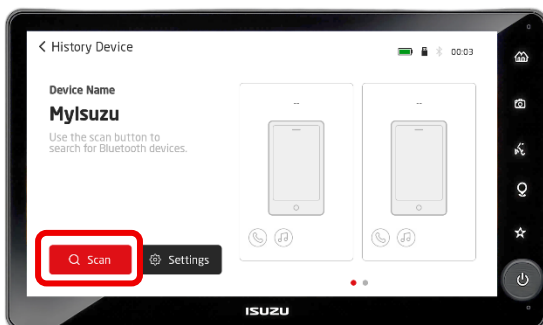

- Enable Bluetooth on both the Android phone and the Head Unit.
- During the initial setup, it is strongly recommended to enable Wi-Fi and Location Services on the Android phone.

Connection Procedure

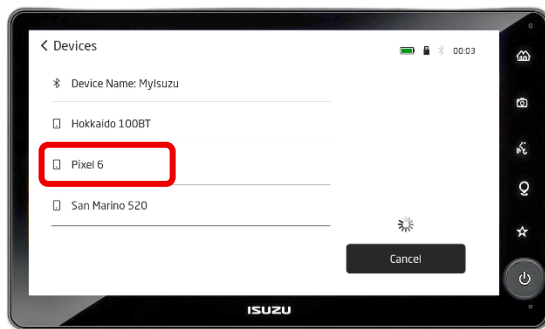

1. Select the “Phone” icon on the lower home screen of the Head Unit.

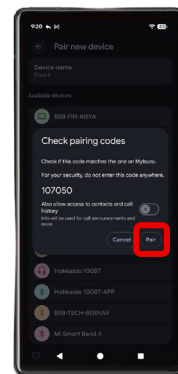

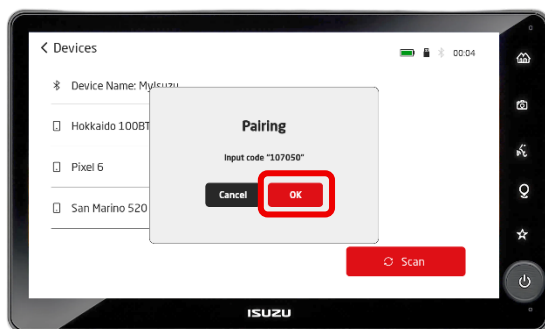

2. Select “Scan” to search for nearby available phones/devices.

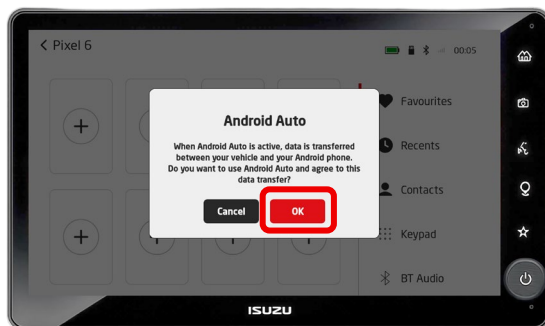

3. Select your phone from the list of available phones/devices to establish the connection.

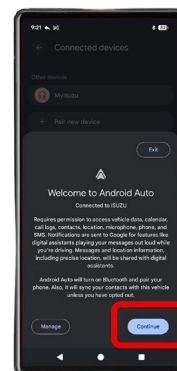

4. Confirm that the passkey in your Android phone matches passkey on the Head Unit, select “OK” on the Head Unit and “Pair” on your phone to start the Android Auto connection.

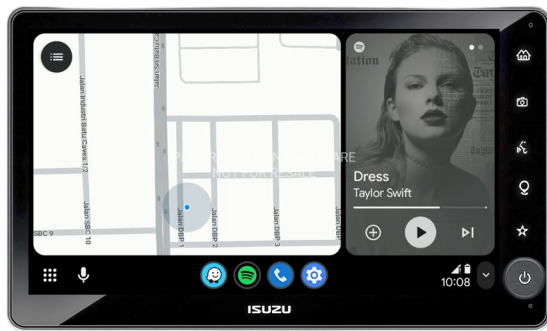

5. When the Data Transfer Consent prompt appears on the Head Unit, select “OK” to allow data transfer between the Android phone and Head Unit.

6. Follow the prompts displayed on the Head Unit, check the phone to learn safety information, accept the privacy policy, and grant the permissions required by Android Auto by selecting ‘Continue’.

7. Android Auto will connect wirelessly after the setup is complete.

How to Use Android Auto:

After the initial setup is completed, Android Auto can be accessed by:

1. Connect the Android phone to the Head Unit using a wired or wireless connection.
2. Android Auto will launch automatically depending on the Android Auto settings on your phone. Alternatively, select the Android Auto icon on the Head Unit display.
3. Once connected, you can use supported Android Auto applications and functions. The apps you want to use on the road have been re imagined so you can use them while your eyes and hands stay focused on the vehicle surroundings.
 - Voice
Touch the voice icon on the screen or on the panel for using Google voice assistant.
 - Touch
You can use the touch screen of the unit to control approved Android auto applications. Application functionality may be limited whilst driving.
